

WASTE REMOVAL DEVICE

ABSTRACT OF THE DISCLOSURE

A waste removal device for collecting waste material is disclosed. The waste
5 removal device comprises a first sheet having an inner surface and a second sheet
attached to the first sheet and overlying the inner surface to define an envelope for
storing the waste material. The waste removal device also includes a third sheet made
from an absorbent material and overlying the inner surface of the first sheet adjacent
to the second sheet. The third sheet is intended to contact the waste material while the
10 waste removal device is being used and the first sheet is intended to provide added
protection to a user by protecting the user from the waste material.
